

ABB string inverters

PVI-3.0/3.6/4.2-TL-OUTD

3 to 4.2 kW

ABB's UNO family of single-phase string inverters complements the typical number of rooftop solar panels, allowing home owners to get the most efficient energy harvesting for the size of the property.

The dual input section processes two strings with independent Maximum Power Point Tracking (MPPT). This is particularly useful for rooftop installations with two different orientations (e.g. East and West). The high speed MPPT offers real-time power tracking and improved energy harvesting.

Efficiency of up to 96.8%

The transformerless (TL) operation gives the highest efficiency of up to 96.8%. The wide input voltage range makes the inverter suitable for low power installations with reduced string size.

This rugged outdoor inverter has been designed as a completely sealed unit to withstand the harshest environmental conditions.

Our most common residential inverter is the ideal size for an average-sized family home.

Highlights

- Single-phase output
- Transformerless topology
- Each inverter is set on specific grid codes which can be selected in the field
- Wide input voltage range
- High speed and precise MPPT algorithm for real time power tracking and improved energy harvesting
- Dual input section with independent MPPT, allows optimal energy harvesting from two sub-arrays oriented in different directions

Additional highlights

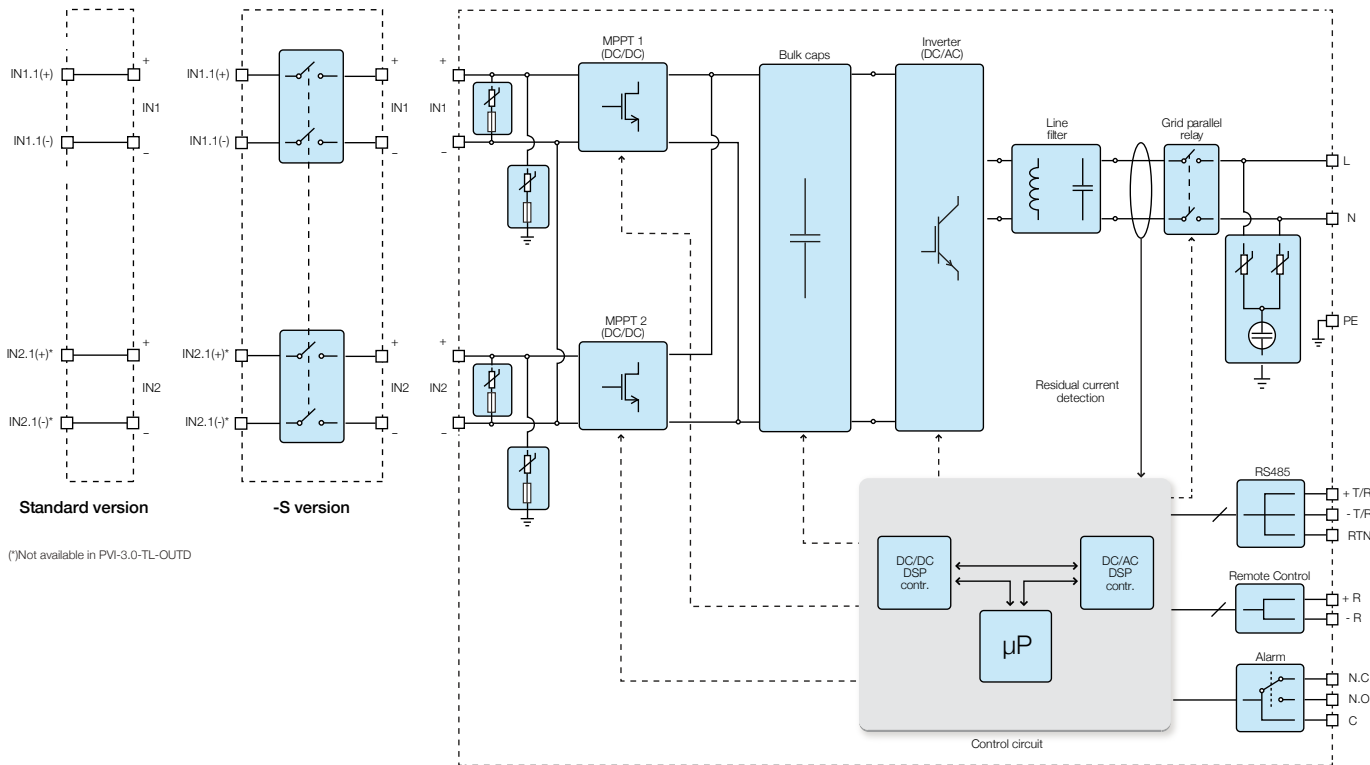

- Flat efficiency curves ensure high efficiency at all output levels ensuring consistent and stable performance across the entire input voltage and output power range
- Integrated DC disconnect switch in compliance with international standards (-S version)
- Natural convection cooling for maximum reliability
- Outdoor enclosure for unrestricted use under any environmental conditions
- RS-485 communication interface (for connection to laptop or datalogger)

Technical data and types

Type code	PVI-3.0-TL-OUTD	PVI-3.6-TL-OUTD	PVI-4.2-TL-OUTD
Input side			
Absolute maximum DC input voltage ($V_{max,abs}$)		600 V	
Start-up DC input voltage (V_{start})		200 V (adj. 120...350 V)	
Operating DC input voltage range ($V_{dmin}...V_{dmax}$)		0.7 x $V_{start}...580$ V (min 90 V)	
Rated DC input voltage (V_{dcr})		360 V

¹ The AC voltage range may vary depending on specific country grid standard

² For UK G83/2 setting, maximum output current limited to 16A up to a maximum output power of 3.68 kW

³ Please refer to the document "String inverters – Product manual appendix" available at www.abb.com/solarinverters for information on the quick-fit connector brand and model used in the inverter

⁴ The Frequency range may vary depending on specific country grid standard

⁵ Limited to 3000 W for Germany

⁶ Limited to 3600 W for Germany

⁷ Limited to 4200 W for Germany
