ENERGIZING LIFE TOGETHER

REC

REAL LIFE
REAL SECURITY

High-performance solar panels from REC come standard with comprehensive industry-leading product and power output warranties.

All REC solar panels include a 25 year linear power output warranty. This ensures that your REC solar panel will perform exactly as you expect it to – every year for 25 years. In addition, the panels come with a product warranty for ten full years. Together, the warranties provide value-adding security you can depend on.

25 YEAR LINEAR POWER OUTPUT WARRANTY

10

YEAR PRODUCT WARRANTY

High-performance solar panels from REC come standard with REC's industry-leading warranties. The promise of linear power output combined with high product quality – as endorsed by credible third parties – provide greater ROI predictability and enable you to best plan your investment.

25-YEAR LINEAR POWER OUTPUT WARRANTY

REC offers an industry-leading warranty for the performance of solar panels. This guarantees higher, linear power output performance over a 25 year period and the promise that each panel will deliver at least 97% effective output during the first year of operation.

This represents an increase of 7% compared to the previously warranted 90% in the first year. The maximum degradation will be no more than 0.7% each year, reaching a guaranteed minimum performance level of 80.2% by the end of the 25th year.

REC ensures the power output of solar panels through a positive sorting of watt classes. This means that REC solar panels will perform between the specified watt class and an additional 5 watts (W). A 260 W solar panel from REC, for example, would produce at least 260 W and a maximum of 265 W.

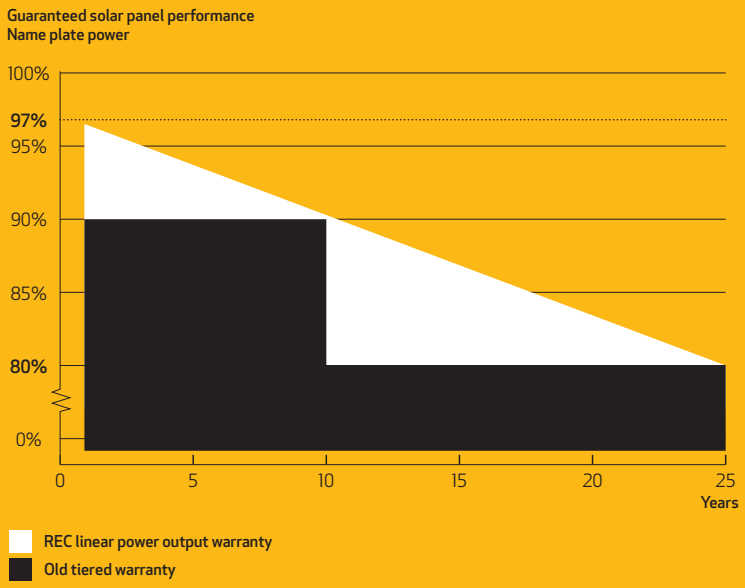
10-YEAR PRODUCT WARRANTY

REC offers a full ten-year warranty on material and workmanship of all solar panels. REC focuses on quality not only in manufacturing, but also with warranties, to ensure that both add value.

The REC manufacturing process and quality assurance mechanisms at REC's state-of-the-art production facility in Singapore have been assessed in third party factory audits by two high-profile engineering firms, Mott MacDonald and Black & Veatch.

"REC's internal processes and quality requirements provide extra comfort on the long term behavior of REC solar panels." Valencia Puccini, Renewable Energy Advisor, Mott MacDonald

High power output, guaranteed



Benefits of REC's warranties:

→ 97% effective power output in the first year
→ Greater return on investment predictability
→ Increased investment security
→ Guaranteed high product quality

REC

REC is a leading global provider of solar electricity solutions. With nearly two decades of expertise, we offer sustainable, high-performing products, services and investment opportunities for the solar and electronics industries. Together with our partners, we create value by providing solutions that better meet the world's growing electricity needs. Our 2,300 employees worldwide generated revenues of more than NOK 7 billion in 2012, approximately EUR 1 billion or USD 1.3 billion.
